

A person's profile is shown in silhouette on the left, looking through a microscope. The microscope's lens is focused on a stained tissue sample, which is visible on the right side of the image. The tissue is stained with blue and orange, showing cellular structures. The background is dark, making the tissue and the person's profile stand out.

# Pushing the boundaries of science

MedImmune is the global biologics research and development arm of AstraZeneca, a global, innovation-driven biopharmaceutical business that focuses on the discovery, development and commercialization of small molecule and biologic prescription medicines. MedImmune is pioneering innovative research and exploring novel pathways across key therapeutic areas, including respiratory, inflammation and autoimmunity; cardiovascular and metabolic disease; oncology; neuroscience; and infection and vaccines.
