

Changing patients' lives through science

AstraZeneca is an exciting, global, innovation-driven biopharmaceutical company; MedImmune is our biologics R&D arm and a world leader in biotechnology.

Together, we're setting the pace for what science can do. Pioneering new methods and rolling back the frontiers of research. Adapting and evolving to pursue discoveries beyond imagination. And turning ideas into life-changing medicines in our core therapeutic areas: Oncology; Respiratory, Inflammation and Autoimmunity; Cardiovascular and Metabolic Disease.

If you share our passion for science and are ready to make a difference to people's lives, join our game-changing business and nothing will hold back your creativity, drive and development.

You'll be working with people who are inspired by the prospect of making what seemed impossible yesterday the new normal tomorrow. So we'll give you the freedom to try new things, challenge traditional thinking, take brave decisions and seize opportunities to make things happen, all within a dynamic environment that brings unexpected teams together in a unique spirit of collaboration and innovation.
