

Cross-disciplinary research in Fribourg

The University of Fribourg covers a wide range of study programmes and research activities in science and medicine.

Fribourg – your place to work,...

- National Center of Competence in Research for Bio-Inspired Materials: an internationally recognized hub for «smart» materials
- Human-IST Institute: excellence in Human-Computer interaction and future technologies
- Fribourg Center for Nanomaterials: innovative research to solve product-oriented problems

... your place to live!

Our campus is everywhere in town – one of four residents is a student. The combination of medieval heritage, vibrant student and research life, as well as its huge range of recreational and sporting activities lends it a unique charm.
