FACULTY POSITIONS AT THE KAVLI INSTITUTE FOR THEORETICAL SCIENCES

The Kavli Institute for Theoretical Sciences (KITS) at the University of Chinese Academy of Sciences, Beijing, invites highly qualified individuals to apply for multiple tenure-track or tenured faculty positions in theoretical physics and related fields. Special consideration will be given to those with experience in condensed matter physics, quantum field theory, quantum computation and information, and complex systems, including statistical mechanics, biophysics and quantum chemistry. Candidates are required to have a PhD or equivalent and to have demonstrated the ability to conduct outstanding research. Successful candidates are expected to carry out independent and innovative research and are encouraged to develop new interdisciplinary research directions. More info: <http://kits.ucas.ac.cn>.

Advantages of joining KITS

- An international academic environment at one of the 20 network members of the Kavli Institutes around the world. We also plan to have diverse faculty, one-third of which will come from a non-Chinese ethnic background
- A joint faculty position in the physics department with a light teaching load
- Excellent opportunities as KITS is undergoing a rapid expansion of its faculty
- Opportunities to work with a number of other KITS postdoctoral fellows
- A salary comparable to the US
- Good housing benefits
- Excellent start-up grants

Candidates should submit: a copy of their curriculum vitae including a list of publications; a summary of research accomplishments; a statement of research interests and research plan; three to five representative publications; and at least three letters of recommendation sent directly by referees. All application materials should be submitted electronically as PDF files directly to the director of KITS, Fuchun Zhang. E: fuchun@ucas.ac.cn
