Supplementary information to: Sustainable development goals for people and planet

Published in Nature 495, 305–307 (2013); http://dx.doi.org/10.1038/495305a.

Figure 1 | Six universal Sustainable Development Goals cutting across economic, social and environmental domains.
**Figure 2** | Six sustainable development goals (SDGs) for integrated delivery of Millennium Development Goals and planetary ‘must-haves’ (or Global Sustainability Objectives). Targets set within each SDG directly address social, economic and environmental dimensions. These goals, and the targets beneath, may be operationalized through a policy framework across levels from international to local, some of it already extant.
