Figure S12

**Dravet syndrome**

**Early myoclonic encephalopathy**

**Epilepsy of infancy with migrating focal seizures**

**Epilepsy with myoclonic-atonic seizures**

Figure S12: Epilepsy-related gene expression in Vgat ECKO telencephalon with links to childhood epilepsies. Graphical representation of genes that showed percentage change in Vgat ECKO telencephalon, compared to controls, with respect to different categories of childhood epilepsies (isolated from McTague et al., 2015), continued in Figure S13.
