Supplementary information S11 (movie) | **Accumulation of virus-specific B cells below and within the subcapsular sinus (SCS) floor.**

Time-lapse imaging series showing virus specific B cells (red, polyclonal B cells in blue) accumulating below and within the SCS floor after introduction of vesicular stomatitis virus (VSV) (green). Images were acquired using multiphoton intravital microscopy and are of popliteal lymph nodes 5 minutes after footpad injection of VSV. The movie is reproduced, with permission, from Junt, T. *et al.* *Nature* **450**, 110–114 © (2007) Macmillan Publishers Ltd. All rights reserved.
